Professional Experience

Product Owner, *GoodLife Fitness* 2025 – Present

- Led product modernization of a legacy location-management ecosystem by consolidating 4 fragmented tools into one source-of-truth platform, improving operational consistency across all clubs nationwide.
- Defined requirements and launched category-based mobile push notifications, enabling all gyms to notify members of disruptions 60% faster through standardized communication workflows.
- Owned discovery and delivery of an AI-powered natural-language query product, reducing manual database lookup requests by 85% and enabling all associates to access club-management information through natural-language prompts.
- Led software entitlement automation for onboarding, offboarding, and employee transfers, reducing access-related IT tickets by 85% across CRM, data, and Microsoft license workflows.
- Automated license and service provisioning across approximately 400 employee lifecycle events, improving access turnaround for customer-facing roles and reducing manual IT workload.

Software Developer, *GoodLife Fitness* 2024 – 2025

- Led CRM cost-optimization initiatives that reduced annual expenses by approximately \$600K USD / 45%, by replacing license-dependent processes with custom microservices and internal workflows.
- Launched digital referral product that replaced paper-based referral workflows with QR code submissions, increasing referral capture by 85% and improving CRM visibility across all locations.
- Built stakeholder alignment for a digital referral program by pitching the product opportunity, securing pilot approval, and supporting rollout from 4 pilot clubs to all clubs nationwide.
- Launched a digital lead-capture product for grand openings and events, capturing 10K attendee leads across 12 events and reducing follow-up time by 90% through automated SMS workflows.
- Prototyped and validated a custom lead-management product concept covering 7 core workflows, informing CRM replacement strategy for lead tracking, ownership, and assignment.
- Technologies and frameworks: JavaScript, React, .NET, C#, Azure, GitHub, Postman, Python, Figma, Java.

Software Developer (Co-Op), *GoodLife Fitness* 2023 – 2024

- Delivered an online lead-capture solution that eliminated an 85% lead loss rate, increasing online lead retention to 100% and improving lead data quality for downstream sales and marketing teams.
- Delivered an internal CASL compliance product that reduced manual contact-verification time by 60%, improving outreach efficiency while reducing compliance risk for outreach teams.
- Partnered with B2B, B2C, and E-commerce stakeholders to gather requirements and improve Salesforce workflows across lead management and compliance processes.
- Technologies and frameworks: JavaScript, React, .NET, C#, Azure, GitHub, Snowflake, Python, Figma.

Education

Bachelors of Computer Science with Honors (Co-Op), *Algoma University* 2022 – 2024

Bachelors of Science with Honors, Kinesiology and Health Science 2017 – 2021 *York University*
