Professional Experience

Product Owner, *GoodLife Fitness*

2025 – Present

- Modernized a legacy club-management ecosystem into a centralized source-of-truth platform supporting all GoodLife clubs across Canada and consolidating legacy systems into one internal tool.
- Enhanced a member notification platform by defining requirements, designing category-based workflows, and launching mobile push notification capabilities for club-impact alerts.
- Launched an AI chatbot for B2B, B2C, and internal associate support, handling 40% of questions and tasks end-to-end before human escalation.
- Owned discovery and delivery of an AI-powered natural-language query solution using Copilot, enabling associates to retrieve club-management information without manually querying databases.
- Led software entitlement automation for onboarding, offboarding, and employee transfers, reducing access-related IT tickets by 85% across CRM, data, and Microsoft license workflows.
- Automated license and service provisioning across approximately 400 employee lifecycle events, improving access turnaround for customer-facing roles and reducing manual IT workload.

Software Developer, *GoodLife Fitness*

2024 – 2025

- Led CRM cost-optimization initiatives that reduced annual expenses by approximately \$600K USD / 45%, by replacing license-dependent processes with custom microservices and internal workflows.
- Led discovery and delivery of an online referral program that replaced paper-based and word-of-mouth referrals with QR code submissions integrated directly into CRM workflows.
- Pitched the referral program to stakeholders, secured approval, and supported a successful pilot that expanded into a Canada-wide rollout.
- Launched a digital lead-capture initiative for grand openings and events, enabling sales teams to collect attendee leads and follow up through automated text messaging.
- Prototyped a custom full-stack lead-management app to replace the existing CRM with workflows tailored to lead tracking, ownership, and assignment needs.
- Technologies and frameworks: JavaScript, React, .NET, C#, Azure, GitHub, Postman, Python, Figma, Java.

Software Developer (Co-Op), *GoodLife Fitness*

2023 – 2024

- Delivered an online lead-capture solution that eliminated an 85% lead loss rate, increasing online lead retention to 100% and improving lead data quality for downstream sales and marketing teams.
- Built an internal CASL compliance tool to help associates verify contact eligibility, improving outreach efficiency while reducing regulatory risk.
- Partnered with B2B, B2C, and E-commerce stakeholders to gather requirements and improve Salesforce workflows across lead management and compliance processes.
- Technologies and frameworks: JavaScript, React, .NET, C#, Azure, GitHub, Snowflake, Python, Figma.

Education

Bachelors of Computer Science with Honors (Co-Op),

2022 – 2024

Algoma University

Bachelors of Science with Honors, Kinesiology and Health Science, *York University*

2017 – 2021
